

SV0091CE

SV0091CE is a cool-weather continental cucumber suited to protected unheated environments. It is a vigorous, healthy plant with resistance to Powdery mildew and is strong against cold stripes.

Disease Profile

HR	CVYV/Cca/Ccu
IR	CGMMV/CYSDV/Px

Features

- // Vigorous and strong plant habit and root system
- // Ability to fill its fruit well
- // Very small neck
- // Resistant to Powdery mildew
- // Strong against cold stripes

Advantages

- // Lower risk of disease and lowers input costs due to disease resistance
- // Fills fruit well and creates an attractive dark green shape with very little neck
- // Maintains good fruit length throughout the production cycle

Benefits

- // Stronger disease resistance package
- // Lower input costs
- // Improved marketability of crop

Agronomics and Cropping Tips

Environment

- // Protected, Unheated

Season

- // Winter, Spring
